

I am writing this as I feel Amateur radio is in danger and needs your protection. I am an amateur radio operator who serves in RACES and provides a link for RACES to the local municipal police department where I am employed. The present FCC Part 15 limits for this technology already can result in substantial interference potential to amateur frequencies. BPL systems that radiate on wide swaths of spectrum and that occupy entire neighborhoods have greater interference potential than localized systems, such as switching power supplies or electric motors. The FCC has made a promise to protect licensed users of the spectrum, we hold you to that promise. Please do not let us down.
